efficiently.**

Daileon is a privately-owned Nigerian business that specialises in the utilities and infrastructure. Often working in technically difficult environments, Daileon Ltd has built a reputation for turning the complex into simple. Through a combination of state-of-the-art equipment, the best personnel in the business, and working closely with our clients, Daileon Ltd prides itself on a track record of solving the toughest of challenges.

Over time the business units have grown organically, through joint ventures and strategic acquisitions, allowing the group of companies to become leaders in their relevant fields of expertise. We are flexible in our approach and have the ability to mobilise quickly and efficiently. The group of companies has stand-alone business units

About Us

Our Legal Status

Daileon Integrated Global Co., Ltd (RC: 717492) - is registered as a limited liability company with the Corporate Affairs Commission (CAC), Abuja - Nigeria. Daileon Ltd was incorporated on 9th November, 2007 with RC Number: 717492.

More About Us

Daileon Limited delivers to its customer high quality, timely and robust Engineering Solutions, Construction Methodology and Asset Management Services with a commitment to the highest Health and Safety Standards.

Daileon Integrated Global Company Limited (simply called Daileon Limited) has been serving the industry in Nigeria for a decade plus. We specialize in engineering, procurement, installation and commissioning of multi-discipline and complex projects. Our multi-discipline teams provide critical input for our clients during feasibility and professional execution services throughout the lifecycle of the assets.

Range of Services

Daileon Limited offers a range of services from consultancy, detailed design & engineering, construction, installation & commissioning, with the disciplines of civil, structural, mechanical, piping/pipeline, and controls, electrical and instrumentation. Our engineers support the complete project cycle from FEED stage through to startup and ongoing Asset Management Services.

With our state of the art fabrication facility, we are also able to offer effective and efficient steel fabrication services to meet the requirements of the oil & gas and construction industries.

VISION

Our Vision

Our Vision is to become, over the next decade, a mid-tier transnational, diversified engineering and assets Management Company serving the Onshore & Offshore Hydrocarbon Processing, Power, Water and Infrastructures Sectors.

We will achieve our vision through a blend of organic growth and bolt-on acquisitions while maintaining a balanced distribution of our sources of revenues between our domestic and selected export markets.

Throughout our journey, we will steadily enhance our capabilities through the development of our human capital, continuous improvement initiatives, strategic partnerships and technologies acquisitions; while leveraging on our company culture, agile operating model and the development and consolidation of long term key accounts' relationships.

Our Mission

Our Mission is to provide our Clients with Innovative, Safe, Capital Efficient and Environmentally Compatible Design, Engineering, Capital Projects Delivery and Assets Management Services solutions while creating sustainable stakeholders' value and maintaining the highest standards of quality.

Core Values

+ **Empowerment**

We promote and support our people active participation in shaping our Company future while valuing their judgments and contributions in executing our strategy and consistently delivering on our Mission.

+ **Accountability**

We are holding our people accountable while ensuring that accountability is based on a clear identification of their expected contribution in achieving our Vision and delivering on our Mission.

+ **Trust**

We hold trust in high regard and emphasize it in the relationships with our stakeholders.

+ **Integrity**

We deal with our stakeholders on the basis of equal opportunities, transparency and fairness.

+ **Leadership**

We emphasize the development of the highest standards of leadership throughout our organization.

+ **Dependability**

We strive to achieve the highest level of dependability in delivering on our mission's commitments.

+ **Safety**

Adhere to safe working practices and compliance with applicable legislation and regulations that relate to our activities.

HSEQ

Daileon Limited has adopted health, safety, environment, and quality (HSEQ) management as a business imperative for sustainable business performance and improvement.

Health and Safety

The health and safety of our employees is our first priority. We are committed to zero tolerance to risks and hazards and take a proactive approach towards maintaining high HSE standards at all times and have zero tolerance to risks and accidents.

Our HSE policies have been instilled within our organizational culture to promote the high standards and practice. We have embedded a behavioral based approach for safety that has every employee aware, educated, engaged and accountable for their actions and the actions of those they are working with.

Daileon Limited is proud to have received numerous awards and certificates of appreciation which reflect our commitment to working under national and international regulations and standards and maintaining a safe working environment.

We provide all our own work force as well as subcontractors with the required training and PPE, and ensure all are familiar with Daileon Limited HSE policies and procedures. Having a strong emphasis on HSE performance also helps us to deliver our services with the highest quality and with optimized efficiency.

Partners

Daileon Integrated Global Company Limited, known as Daileon Limited, is a leading private shareholding company in the State of Nigeria and has, over the years, contributed significantly to the development of the Nation.

Founded in 2007, Daileon Limited has diversified forming various subsidiaries in several market sectors including real estate, construction, oil & gas, trading & services.

Patsbolo Nigeria Limited – Daileon Integrated Global Co., Limited Joint Venture

In 2009, a joint venture was established between Patsbolo Limited and Daileon Limited to enhance international capability and support with local delivery. This joint venture has on / offshore capabilities and expertise providing facilities support engineering, and consulting.

Hi-Borde Global Oil & Gas Limited – Daileon Integrated Global Co., Limited

In 2011, the two-in-one company expanded into the Oil, Gas & Petrochemical Sector, and in this time has gained extensive experience and references in the On- and Off-shore Oil and Gas Industry, delivering shutdown / turnaround and specialist services, ranging from:

Main contractor responsibility for complete plant turnaround.

- Specialist engineering services including assessing and managing the

OUR BUSINESS PARTNERSHIPS

asset operational risk.

- Managing unit maintenance projects (e.g. steam plant refurbishment).
- Complete solutions, including all of the aforementioned services.

Their client reference list includes: - Shell, Chevron, Seplat, Total, Exxon Mobil etc.

Specifically has delivered:-

- Turnaround Contracts at Warri Refineries.
- Boiler, Steam Plant Asset Management Contracts (including inspection, engineering recommendations / studies, and execution of maintenance works) – Liquefied National Gas (LNG) Rivers State.
- Other Plant Integrity Management Contracts – Shell – Nigeria.

Wall's Integrated Service Limited – Daileon Integrated Global Co., Limited

Most environmentally safe and cost effective bio-remediation process for the mitigation of hazardous waste, spills and contamination virtually anywhere of any size, large or small.

Environment Policy

Daileon Limited is proud to be a part of the development of the State of Nigeria which is experiencing rapid growth in infrastructure and expanding industries to meet the increasing demand for services and resources.

We are working closely together with our clients and partners across all areas of our business to limit our impact on the environment and to prevent environmental incidents.

Daileon Limited always ensures that our environmental management system and procedures exceed the legal standards and requirements and all our work is carried out under international, accredited ISO14001 standards.

QUALITY

In keeping with our commitment to QA/QC standards, we at Daileon Limited are 100% dedicated to providing quality services for our clients.

We go beyond the basics and are not content with simply meeting the project's quality requirements. This is why we utilize only the most reliable and knowledgeable personnel to ensure the implementation of the highest quality standards.

our Key Services

01

Asset Management

Daileon Limited provides asset management services at a multi-industrial level.

02

Commissioning

We are capable of undertaking large scale, complex civil and industrial projects.

03

Construction

Daileon Limited has been laying a strong foundation upon which rests an impressive resume of completed projects and satisfied clients.

04

Engineering

Daileon Limited's capabilities include expertise in the oil and gas facilities engineering works

05

Project Management

Daileon Limited's well experienced project managers are fully-equipped for undertaking large-scale multi-discipline EPIC projects.

06

Shutdown Services

We pro-actively strive to avoid time and monetary delays resulting from poorly planned and executed maintenance shutdown tasks.

07

Studies

Daileon Limited performs specialist studies on a wide range of complex projects.

Assets

MANAGEMENT

Daileon Limited provides asset management services at a multi-industrial level, covering the oil and gas, petrochemical, industrial and infrastructure sectors. Our diverse and highly skilled teams are capable of providing solutions across all phases of the asset lifecycle, catered specifically to our clients' needs. We optimize our results by building long-term relationships with our clients, helping them to achieve their business targets at reduced cost and risk.

Our asset management lifecycle provides a seamless service from consultation and design, innovative engineering, construction, operations, maintenance and upgrades with a continuous focus on health and safety.

Commissioning & CONSTRUCTION

Daileon Limited engineers and project management teams apply specialized engineering techniques and procedures to assure all systems for each project are designed, installed, tested, operated and maintained according to operational requirements of our customers. Through our integrative commissioning management system, we are capable of undertaking large scale, complex civil and industrial projects. Our Technical and IT teams are experts at dealing with large volume and complex commissioning data, contributing to the delivery of optimal results and customer satisfaction.

To enable Daileon Limited to achieve optimum results, we have a fully fledged in-house support department consisting of workshop, plant machinery & vehicle and warehouse. Our experience and the ability to adapt allow us to undertake numerous construction projects in varied industrial sectors and locations.

Daileon Limited has always been committed to working in partnership with its clients. We realize that the result of our work has an impact on our customers' ability to succeed. We believe that our competitive pricing and guarantee of quality has provided us with many repeat customers over the years.

WE BUILD FOR THE FUTURE

Daileon Limited has been laying a strong foundation upon which rests an impressive resume of completed projects and satisfied clients.

- Piping and structural fabrication and erection.
- Installation of industrial equipment and piping systems.
- Civil fabrication and pre-cast electrical and instrumentation.
- Commissioning works.
- Supervision and coordination of specialized subcontractors.
- Maintenance and turnaround shut-downs.

Engineering

THE OIL & GAS SECTOR

Daileon Limited's capabilities include expertise in the oil and gas facilities engineering works, for upstream, midstream, and downstream onshore facilities.

This includes but not limited to oil production well head facilities, flow lines, degassing stations, cross country pipelines, gas recovery systems, relief and flare systems, utilities, compressor stations, 3 phase separation, distillation columns, refinery and water treatment plants.

Daileon Limited has extensive experience in Green Field, and Brown Field based engineering works. Expertise also extends to Brown Field expansions, Automation Upgrades, and other complicated facilities upgrades.

The basis on which Daileon Limited works is that all our engineers must have experience not only in the design of these facilities, but in practical aspects related to Constructability, Commissioning, and their subsequent operation. The key success observed is that design of a system must be not only catering for the design intent or throughput of the facility, but to practical startup, operational, and maintainability aspects of the system. Engineers in Daileon Limited are exposed to the complete cycle of the project, from FEED stage to final Handover of the system to the Client.

Procurement & PROJECT MANAGEMENT

Daileon Limited has a fully qualified team of procurement engineers, officers, QA/QC engineers and logistic personnel with the expertise to deliver the right material at the right time for project execution.

Our procurement team meticulously and systematically identifies and quantifies procurement practices which are effective in delivering value-for-money services as well as identifying opportunities for improvement.

This department is also responsible for implementing procurement strategies and business practices that will provide operational efficiencies and cost savings for our clients.

WE UNDERTAKE YOUR PROJECT FROM START TO FINISH

Daileon Limited's well experienced project managers are fully-equipped for undertaking large-scale multi-discipline EPIC projects. They are able to manage projects more precisely and effectively by applying the required knowledge, skills, tools and analytical techniques to meet project requirements. Our system of logistical planning ensures the timely distribution of resources, manpower, materials and equipment over multiple operations.

Daileon Limited has commenced a program to provide PMP accreditation to the Project Management Personnel (PMP) to further demonstrate the capabilities of the company to provide qualified personnel.

SHUTDOWN SERVICES & STUDIES

At Daileon Limited, we pro-actively strive to avoid time and monetary delays resulting from poorly planned and executed maintenance shutdown tasks. Therefore, we pay meticulous attention to the scheduling and logistical side of shutdown. Daileon Limited has executed an average of three shutdowns per year in various stations in OBEN Fields / Onne Areas for SEPLAT/NAFCON (Notore Chemical Industries and now O-Secul Nigeria Ltd).

Shutdown works include:

- Catalyst Loading/Unloading
- Heat Exchanger / Test-Separator Maintenance - Rotary Equipment
- Inspection / Testing
- Vessel Cleaning / Pressure Hydro-Jetting Equipment
- Valve Dismantling / Testing / Re-installation
- Instrument Dismantling / Calibration / Re-installation
- Repair of Concrete Foundations, Demolition of Redundant Foundations/ Supports

STUDIES

Daileon Limited performs specialist studies on a wide range of complex projects. These studies include:

- Hazard and Operability Study (HAZOP)
- Safety Integrity Level Study (SIL)
- Qualitative Risk Assessments (QRA)
- Environmental Impact Risk Assessment (EIRA).

Project Management

Daileon Limited's well experienced project managers are fully-equipped for undertaking large-scale multi-discipline EPIC projects. They are able to manage projects more precisely and effectively by applying the required knowledge, skills, tools and analytical techniques to meet project requirements. Our system of logistical planning ensures the timely distribution of resources, manpower, materials and equipment over multiple operations.

Daileon Limited has commenced a program to provide PMP accreditation to the Project Management Personnel (PMP) to further demonstrate the capabilities of the company to provide qualified personnel.

Our CAPABILITIES

We have a full-fledged team of Procurement Engineers, Officers, dedicated QA/QC Engineers, Logistics Personnel with necessary qualification and expertise to deliver the right material at right time as required for the projects executed.

We also have full expertise in the oil & gas facilities engineering works, for upstream, midstream, and downstream onshore facilities.

Our fabrication workshop provides our clients with the highest quality of steel fabricated products.

Workshops Installations

We have succeeded in putting together the first team who are passionate about what they do and environment which is nurturing, demanding and motivating.

The installation of specialist machining tools and ancillary equipment provides an effective and efficient steel fabrication process to service Clients in the oil & gas and construction industries. Our objective is that new machines will enable the required products to be produced:

- At a significantly lower cost with improved quality and accuracy that will allow reduced time for site installation / fit-up
- With a shorter time period between notification and fabrication
- Reliable delivery of fabricated components
- Throughput of up to 450T per month for typical mix of work

The Daileon Limited workshop has the following options:

Pipe Cutting and Beveling

- Beam Line for structural components.
- Plate Cutting and Punching / Drilling Machines.
- Integrated Machine Control System.
- Blast and Paint
- Material handling systems include 5 overhead cranes up to 32T capacity

These specialist machines will be operated by trained and competent Daileon Limited employees.

Mechanical & Piping Works

Our mechanical engineering department handles the rotating / static equipment for the facilities including but not limited to:

- » Pumps
- » Compressors
- » Storage Tanks
- » Pressure Vessels
- » Separators
- » Lifting Equipment
- » Pig Launchers / Receivers.

This department has the capability of specifying the equipment specifications and datasheets for all these equipments including providing the related vendor document review and approvals. In addition, this department is capable of detailed engineering for static equipment design using PV ELITE Software for pressure vessel equipment according to relevant ASME Section codes. Typical deliverables include:

- i. Equipment Specifications
- ii. Equipment Datasheets
- iii. Nozzle Orientation
- iv. Calculation Reports
- v. Fabrication Drawings for Equipment
- vi. Vendor Selection reports

We Carry out Professional Piping Operations

This department deals primarily with Piping Systems, in accordance with Client specifications, and ASME B31.1, and B31.3 codes. This department is capable of specifying piping Component Classes, as well as overall layout, piping engineering and detailing, as well as Isometrics and MTO. 2D and 3D capability is available for the piping as well as 2D AutoCad and 3D CadWorks. The Piping department also performs stress analysis and pipe support designs for piping systems:

Civil and Structural Construction

At Daileon Construction, we provide not only innovative design and high quality, but the skill, guarantee and reliability only a local construction company can provide. With a passion for construction, we provide the highest level of service to our clientele (Private, Commercial, Governments and its Agencies) by dedicating our time and energy to producing only the finest quality of workmanship to enhance the lifestyles of our clientele.

PROFESSIONAL CONSTRUCTION SERVICES

- Residential Construction
- Commercial Construction
- Industrial Construction
- Asphalt Roothing & Pavement Construction
- Stormwater Drainage
- General Construction.

Daileon Construction carries a complete range of civil contracting services with extensive experience in:

RESIDENTIAL CONSTRUCTION:

Daileon Construction has been creating exceptional home modifications and building quality homes for years now.

INDUSTRIAL CONSTRUCTION:

The civil department caters for all aspects of civil works, at Daileon Limited, we also specialize in civil works related to facilities engineered for the oil and gas which include the pipe supports, pipeline supports, equipment buildings, shelters, substations, control rooms, roads, drainage, fencing, and similar. STAAD Pro and Foundation 3D are software commonly used.

Infrastructural and Road Construction

Daileon Ltd., excels in constructing robust and well-engineered roads, emphasizing durability and safety. The company's proficiency extends to World Bank projects, contributing to the advancement of road infrastructure in key states including; Lagos State, River State, Delta State and Edo State.

Daileon Ltd., manages the sourcing of equipment, labour hire, supplies and also the project planning of all major road construction projects. Our process for major road constructions starts with understanding the needs of the project and ends with delivering the project safely and within the scheduled time, budget and quality parameters

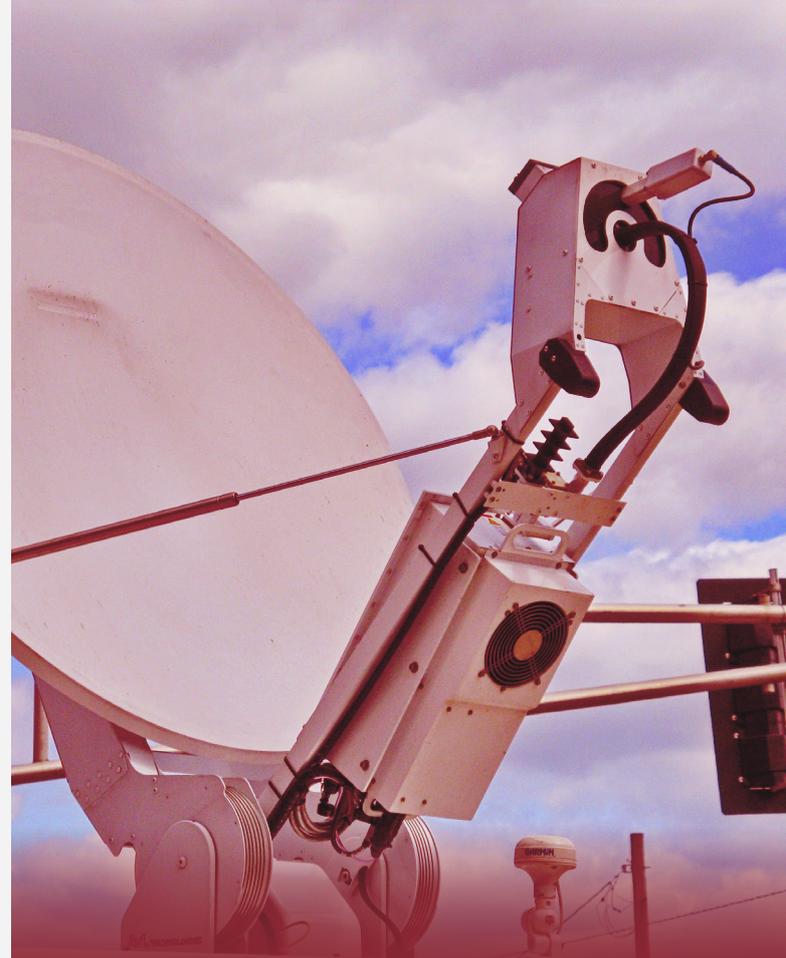

Electrical Network & Power

The fully fledged electrical department takes care of all electrical engineering requirements for oil and gas and other industrial facilities. Power is a major requirement in such facilities, with a high emphasis for good engineering practices. Loss of power means loss .

These services include:

- Electrical Building Equipment Layout
- Typical Installation Details
- Key Single Line Diagram (SLD)
- Single Line Diagrams
- Protection & Metering Schematics
- Relay Co-ordination Study Reports
- Electrical System modeling (CYME)
- Substation Control System (SCS) specifications
- /O Schedule for SCS
- E&I Interface diagrams

Networking & Telecommunication

Daileon Ltd delivers robust telecommunication infrastructure deployment that supports reliable voice, data, and network connectivity across multiple environments.

Our telecom capabilities cover:

- Fiber optic and structured cabling
- Tower, mast, and antenna installations
- Network infrastructure configuration
- VSAT installation and configuration
- Equipment rack and repeater installation
- Testing, commissioning & technical support
- Specification for Fiber Optic Cables and Datasheet
- Fiber Optic Cable Route Plan
- Fiber Cable Installation Detail

Pot Holing

Pot Holing is a fast, convenient and no mess method available to locate underground utilities or excavate in the vicinity of high risk utilities. It is a safe and environmentally friendly method of excavating around very high risk utilities such as high pressure gas, direct buried fibre and large power cables.

Pot Hole excavations use low pressure water to loosen the ground formation and then the vacuum system is used to remove the loosened ground. This low pressure ensures that there is no damage or risk of damage to the underground utilities being located.

This method can also be used for cleaning of hard surface areas such as storm water drains, sewer mains, manholes, pits and existing conduit runs. This system is becoming the method of choice, as it is a non-destructive method in which the existing underground services are protected.

Management

QUALITY PLAN

Client Satisfaction Remains the Goal in all we do at Daileon Ltd.

Daileon Ltd., advocates the policy of self regulation and is committed to the development and implementation of an effective quality management plan that contributes to the successful completion of all engaged projects.

It is the objective of our directors and working staffs to complete the projects on time, producing work that is of premium quality and within budget.

To ensure that Daileon Ltd., delivers a world class product as a contractor, we operate under a quality assurance framework that conforms to ISO 9001 standards.

The framework includes a series of quality checks at each step in the project life cycle to ultimately ensure a high quality product is delivered within specified timeframes and budgets according to the requirements of our customers.

This includes work methods, testing procedures, construction material procurement, materials extraction procedures, and quality and detailed methodology for all activities.

Our policy is to provide these services in a manner that both satisfies the needs and expectations of our clients and adheres to relevant regulatory and statutory requirements.

Relevant information and knowledge is captured and made available across the company, building up an internal resource hub.

The Company's Management Team

Daileon Limited's greatest assets are our people. Our commitment to being the Employer of Choice is paramount to us and is reflected in our program of investment in accommodation, employee services and training.
